

GATWICK'S BIG ENOUGH

Gatwick plans to increase flights from **285,000** a year to **390,000**

That is an extra **23.9 million passengers a year**, and **additional carbon emissions** reaching **ONE MILLION TONNES BY 2050**

The Gatwick Master Plan will:

- Increase the number of flights off the main runway
- Turn the emergency runway into a second runway
- Safeguard land for a third runway

TRAVEL: Using two runways would lead to 74 million passengers a year, compared to 46.1 million today, an increase of 52%

ROAD: In 2017, 54% of passengers arrived at Gatwick by road. Gatwick plan to add an extra 8.1 million passengers as early as 2022/23 leading to more congestion on our roads

RAIL: Gatwick's proposed expansion would add 3.25 million passengers a year to the Brighton line by 2022/23. (Source: Research on surface access to Gatwick Airport by Jeremy Early, unpublished)

CLIMATE CHANGE: More planes mean more damage to the planet. The carbon emissions from Gatwick Airport will reach a projected one million tonnes a year by 2050 (Source: AEF)

THE EMERGENCY RUNWAY:

would be used by departures only along similar flight paths to today, but additional capacity would allow both arrivals and departures to increase over 40% adding 90,000 extra flights a year by 2032 to the current 285,000 (Source: Figures from The Gatwick Master Plan)

AMENITIES: There is already a shortage of affordable housing, health care and school places. Gatwick state an additional 20,000 staff will be needed, plus 29,000 for the proposed business park. A lack of unemployment in the region means staff will commute into the Gatwick area resulting in more traffic
